

PREVENTION INTERVENTION EDUCATION

WWW.CENTERFFS.ORG

The Center For Family Services Inc., a sizable non-profit human services organization serving south/central New Jersey began it's relationship with Protective Services Group (PSG) in early 1992 during the completion of a construction project on a group home for disadvantaged youth. It was apparent to us early on in our new vendor relationship with PSG that we had finally found a security vendor who was reliable, competent and extremely responsive to our organization's needs.

As an IFMA Certified Facility Manager operating over sixty-five commercial properties, I have come to rely heavily on Protective Services Group over the years for their expertise and guidance to ensure that my properties remain safe, secure and compliant at all times.

Having utilized numerous other security vendors over the course of my 25+ year career, I have found that Protective Services far exceeds any of their competitors in providing quality installation, inspection, maintenance, and monitoring of Fire and Burglar alarm systems. Although, PSG is likely not the lowest priced security vendor around, when it comes to reducing your companies risk exposure and keeping your staff and clientele safe 24/7... I believe you get what you pay for!

For me, I know I can sleep easy at night while Protective Services watches over those I am entrusted and responsible for and to me that's worth its weight in gold. In my professional opinion, you will not find a security vendor with greater integrity or expertise than you will find in Protective Services Group.

Respectfully,

Andrew G. Swenson, CFM
Senior Vice President of Operations
